

JC HEIKEN ANGUS & SONS

19th Annual Production Sale
Miles City Livestock Commission
Miles City, Montana

Tuesday, February 24, 2026
1:00 pm

Welcome to our 19th sale offering of **JC Heiken Angus and Sons** bulls! We are pleased to once again offer you the top 150 of 350 yearling bulls along with 80 yearling heifers out of the heart of our herd.

Our family has ranched at Broadview, Montana for 4 generations, developing an elite Angus herd focusing on fertility, depth, efficiency and good feet.

This year's offering includes bulls off some of the nation's top herd sires, as well as some of our own tremendous sires we have hand picked over the past several years. The EPDs on these bulls have been enhanced using AGI's AngusGS testing, with parentage verification.

We AI a large portion of our cows in the spring. The bulls were weaned in mid September and were fed a ration of alfalfa hay and barley hay along with wheat midds, corn and beet pulp. The bulls are developed in large pens where they get lots of exercise, ensuring good, sound feet and are ready to work for you.

We try to produce bulls weighing 1250 - 1400 pounds by the time we deliver in early April. **We will winter them until then at no charge, with free delivery.** In order to obtain more accurate readings, we wait to fertility test until later March when the bulls are older and the weather is warmer; at that time, all bulls will be fertility tested by our vet, Dr. Dael Householder, DMV, and guaranteed fertile before delivery.

Feel free to stop by the ranch anytime to preview the bulls, see the cows, or simply say hello. We will once again host a free luncheon before the sale, so come early. The bulls will be penned at the stockyards on Sunday, February 22 and videos of the bulls can be viewed on line at www.superiorlivestock.com and www.dvauction.com.

Sale Location

Miles City Livestock Commission
337 Interstate 94 Business Loop
Miles City MT 59301
406.234.1790

Bull Viewing

Bulls can be viewed anytime at the ranch up until the Sunday before sale day. Bulls will be shipped to the stockyards and can be viewed there starting Sunday afternoon, February 22 through sale day. Videos of the bulls are available at www.superiorlivestock.com. The sale will also be broadcast on Dish Network Channel 997 and online through DVAuctions.

Yearling Heifers

Heifers will be sold as commercial and must be purchased in sets of 10 head minimum.

Genetic Verification

All bulls have been DNA tested using AGI's Angus GS, powered by Neogen GeneSeek, genomic testing with parentage verification and enhanced EPDs. EPDs are current as of 1/16/2026.

Terms of Sale

All bulls sell under the suggested Terms and Conditions of the American Angus Association. All bulls must be paid for in full on sale day. Any announcements from the sale block take precedence over any printed material.

Guarantee

All bulls are guaranteed to breed for the first breeding season. If the bull is unable to breed for any reason, you have the following options:

- Replacement with an equal or better bull;
- Credit in next year's sale; or
- Full purchase price back, less salvage value

Health and Breeding Soundness

All bulls are eligible for delivery anywhere in the United States. All bulls will be checked for breeding soundness and fertility after the sale, and will be guaranteed sound and fertile at time of delivery.

Nutrition and Feeding Analysis

Nutrition and feed rations have been evaluated and supplied by Tod Shenton, PhD, with Cache Consultants.

We will be retaining 1/3 semen revenue rights on all bulls sold in the sale.

JC HEIKEN ANGUS & SONS

19TH ANNUAL SALE

Welcome to the JC Heiken and Sons 19th Annual Production Sale.

There are families, and then there's the Heiken family. Joe, John, Brian, and Ben share many family traits, but none is stronger than their shared passion for Angus cattle. From breeding, calving, and weaning to marketing the bulls, this family is truly all in.

What sets these gentlemen apart is their desire to build a legendary cow herd. If I heard it once from Joe, I've heard it a hundred times: "Why would you use a sire that you wouldn't want one hundred daughters out of?" Sage advice from the senior member of this incredible team. Maternal excellence reigns supreme at the Heiken operation, and if you ever get the chance on a summer day to visit the Heikens at their summer range and see this cow herd in its entirety, you'll be glad you took the time.

This year's sale comes at an unprecedented time in the beef cattle industry, where new highs seem to be the norm rather than the exception. One thing is clear—there is a window of opportunity to capitalize on this tremendous market, and it starts with high-quality bulls. While bull prices are trending higher, that cost is offset by strong calf and cull cattle prices. In fact, the number of steer calves it takes to purchase a registered Angus bull is lower than it has been in recent years. Load up on quality genetics and enjoy the long-overdue ride.

Last, but certainly not least, the Heiken family is bringing to town an exceptional set of heifer calves straight out of the replacement pen. These are not meant to be traded—they are meant to be treasured. These are the kind you build a cow herd around.

If I can do anything for you prior to the sale, or if you need assistance on sale day, please do not hesitate to call.

Livestock Auction

ALL NEW PUREBRED PLATFORM

Bid.SuperiorLivestock.com

VIEWING THE AUCTION ONLINE

The auction will be broadcast online at Bid.SuperiorLivestock.com and the pre-recorded videos will also be hosted there prior to and on sale day. You do not need an account or login just to watch the auction.

ONLINE BIDDING

Go to Bid.SuperiorLivestock.com for Superior's new online bidding platform. If you have not registered there before you will need to create an account if you wish to bid (there is no registration required just to watch the auction). Once you have created an account, request a buyer number and you will then be able to bid online with the largest and most trusted cattle marketing entity in North America. Superior's new platform allows you to see both the live stream of the auction AND the pre-recorded videos on one screen at the same time!

TURN IN BIDS OVER THE PHONE

This is Superior's suggested bidding method for anybody who does not have consistent, high-speed internet. You still must register an account at Bid.SuperiorLivestock.com and request a buyer number and upon doing so you will see the bid line phone number. Just watch the auction online and call in at least 2 lots ahead of the lot you are looking to bid on.

FOR HELP WITH REGISTRATION OR ANY PART OF THE BIDDING PROCESS PLEASE CALL SUPERIOR AT (800) 422-2117.

S Armstrong offers a fresh pedigree with tremendous mating flexibility, making him an easy fit across a wide range of cow families. He combines a striking, masculine phenotype with an EPD profile that delivers calving ease, added growth and excellent docility. His strong maternal traits point toward productive, long-lasting daughters, while his ability to improve foot quality adds durability and structural integrity. Armstrong is a complete, forward-looking sire built to add both immediate performance and long-term maternal value.

Baldrige Keynote combines elite maternal power with real-world performance. His maternal genetics stem from a Logo cross on the famed Y69 cow—recognized as one of the highest income-producing cows in the Angus breed and the source of numerous proven herd sires. Keynote has already sired some of the thickest, most impressive calves in this calf crop, showing exceptional muscle and dimension. We are particularly excited about his balanced birth-to-growth EPD profile, all packaged in a moderate, stout-made design. These calves are shaping up to be extremely efficient, easy-doing cattle and we expect him to make a lasting and positive impact on our herd.

Sitz Incentive 704H's exceptional feet caught our attention during the 2021 spring sale season. He ranks in the top 1% of the breed with his Claw EPD and 30% for Angle; he has provided the right genetics to continue our commitment to improving the feet in our herd.

His dam is phenotypically one of the best cows we've seen, standing on a near perfect set of feet. She was one of the top selling cows in Sitz' 2021 Female Sale. Incentive daughters are the stoutest heifers we have; his progeny will develop and mature to provide the essential bases for beef production.

Boyd Bedrock offers a rare combination of breed-leading performance traits matched with excellent phenotype, structural correctness and the added advantage of being an outcross to most mainstream bloodlines. His sire is a powerfully constructed bull that has made a significant impact on the Angus breed by consistently adding extra pounds and performance while maintaining body depth and muscle expression.

Raven Republic stands out for his depth of body, muscle shape and structural integrity, all wrapped in a moderate, efficient design that fits today's production demands. Republic offers a balanced EPD profile that supports calving ease, growth and maternal strength, making him a versatile option across a wide range of cow types. His progeny are the kind that thrive in real-world environments—sound, easy-doing and built to last—positioning Raven Republic as a dependable sire for programs focused on longevity, efficiency and long-term profitability.

Vermilion B2 was our selection from the 2022 Vermilion Fall Sale and has proven to be a bull worthy of being excited about. This Bomber son offers an exceptional birth-to-yearling EPD spread, combining calving ease with added performance and stretch. He excels for carcass merit with an impressive \$C of 337, while also ranking in the top 2% of the breed for foot angle—adding real-world structural value. Vermilion B2 has established himself as a dependable heifer bull and his progeny show added frame, length and balance. His daughter, JCH J&K Miss Wix 5613, was recently selected as the pick of the heifer calves headed to Skinner Ranch, further validating his maternal and production value.

We are proud to be a participating producer of the Montana FFA Foundation Bulls for Blue Program!

15% of Lot 10 will be donated directly to the Montana FFA Foundation to support Supervised Agricultural Experiences (SAE) student grants across Montana.

Help us make a lasting impact for Montana FFA members!

Recommended for heifers and cows

Our recommendation for heifer bulls is determined by reviewing the bull's birth weight and EPDs, as well as the dam's previous progeny to verify there is no high birth weights for at least two generations.

When creating our contemporary groups at weaning, we keep our groups large making them more meaningful. We use the same contemporary groups, then, for yearling groups.

VERMILION SPUR E119

AAA 18838098

Spur E119 continues to leave a lasting mark on our cow herd. Multiple grandsons are represented throughout this offering, consistently stamping cattle with low birth weights, solid carcass merit and sound feet. His daughters are the kind that last - production, functional and easy to keep in the herd.

American Angus Association Selection Tools

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Dockility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable dockility in a sire's offspring compared to another sire.

MATERNAL Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), is a predictor of a sire's genetic merit for milk and mothering ability in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

FOOT SCORE

Claw Set (Claw), is expressed in units of claw-set score. A lower EPD is more favorable, indicating a sire will produce progeny with more ideal claw set, which is toes that are symmetrical, even and appropriately spaced.

Foot Angle (Angle), is expressed in units of foot-angle score. A lower EPD is more favorable, indicating a sire will produce progeny with more ideal foot angle, which is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass traits where the units of measure are in trait format and analyzed on an age-constant basis.

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value Indexes, reported in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. Increased selection pressure on \$W increases weaning and maternal milk traits while increasing mature cow size.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals. Components for computing \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

Feedlot Value (\$F), expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value (\$G), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), expressed in dollars per carcass, represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase, and market these animals on a quality-based carcass grid.

Get more dollars per head with Heiken genetics.

According to the American Angus Association, \$M, an index expressed in dollars per head, is used to predict profitability differences in progeny due to genetics from conception to weaning. The underlying objective being producers will retain a portion of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. \$M evaluates traits such as calving ease direct and maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight and foot score EPDs (claw set and foot angle) - providing a good overview of the whole animal. Logo, Incentive and Resilient sit atop the breed for \$M boasting +107 (1%), +100 (1%) and +89(3%), respectively. In addition, the \$M average of this offering is +85.7, placing them in the top 15% of the breed and 40% of the offering is in the top 10%.

Logo remains a major player in our herd. His daughters are some of our all-time favorites because they simply check so many boxes. They are moderate in size, easy fleshing and extremely functional, with sound feet and udders that hold up year after year. These females are consistently fertile, maintain body condition with minimal input and raise calves that are competitive from birth through weaning.

NOTES:

SITZ APEX 10554

Sitz Apex was our pick of the 2025 Sitz Fall Sale. We are excited about the influence this elite heifer bull will have on our program. He offers an outcross pedigree, proven calving ease and a balanced phenotype with added length and muscle. Apex is built right from the ground up with sound feet and legs and the kind of maternal profile that should translate into productive, long-lasting females. We look forward to building a large, uniform group of daughters by him in the years ahead.

Semen is now available. Contact us for more information.
