Welcome

Welcome to our 2026 annual bull sale!

On behalf of our operation, we would like to extend this catalog of information that contains our offering of Red Angus genetics to you. We hope that you find the information provided useful in sorting through the bulls we are offering this year. If there is additional information that you need that is not provided, please let us know, and we will get you the material needed to help you make the best decision possible.

We began our venture into Red Angus in 1985 and have been developing our genetics to flourish in our eastern Montana environment through the genetic selection of a specific type of cattle that will thrive in our conditions. We allow the pressure of the environment to aid in our genetic selection. Cattle that can't breed in a short breeding season or raise an acceptable calf, all while not having any issues (feet, udder, disposition, fleshing ability), and bulls that can't handle covering large numbers of synchronized cows or heifers work themselves out of a place to stay. We also spend time on the road viewing other operations that are like minded and place an emphasis on the economics of the cow/calf producer as a high priority. The time we spend seeing other genetics thriving in other operations and also producing all the traits we feel are necessary for profitability is what we consider to be a very valuable investment back into our operation.

Many will notice that we use some sires for many years. When we find sires that fit well, we will try to pull as much as that sire has to offer into our base herd to improve our genetics. This also breeds consistency into our herd with many half-sisters producing offspring that are uniform in type and kind. On the other hand, we are always bringing in new genetics that we have found to offer something different genetically while still aligning with our genetic model for profitability.

The year of 2025 has been a year of extremes in many aspects. The ranch was close to a drought most of the growing season but experienced above average moisture in late July and early August. These late rains provided a green up in our pastures that allowed our genetics to express their growth characteristics for the first time in many years. Our weaning weights are 50 + pounds better than they have been, which has carried over to the yearling weights in our offering being higher as well. The extremes were also experienced in the cattle market with the highest market prices seen ever!!! It is nice to see a beef market that allows the cow/calf producer to be profitable, but when we consider the costs of everything that we purchase to operate a ranch, the beef price hasn't kept up with the expense side of our business equation.

The bulls in this offering will sell in catalog order. This order is arranged to begin with a pen of high-performance cow bulls followed by a pen of high-performance heifer bulls. The remaining of the sale is pens of bulls by sire group that allows for good bulls suitable for heifers and/or cows to be distributed throughout the sale.

Later measurements such as scrotal circumference and hip height will be available on our website and DV Auction as they are taken. As in the past, some of the bulls in the offering might be removed from the sale due to not passing a BSE (breeding soundness examination) prior to the sale. These bulls will be retested and offered private treaty once they pass their BSE.

May the Lord Bless you,

Bruce, Tena, and Jaclyn Ketchum
Jeff, Cele, Blaze, and Ember Menees

As servants of the Lord, we are striving to be stewards of the land and cattle that He created and allowed us to manage so that we may glorify Him.

Bruce, Tena & Jaclyn Ketchum
Jeff, Cele, Blaze and Ember Menees

Sale Information

Milk Creek Reds Bull Sale Saturday, March 21, 2026

1 p.m. MDT • Milk Creek Reds Ranch • Plevna, MT

Selling:

100 Yearling Red Angus Bulls

SALE DAY LUNCH:

Complimentary lunch and pie will be served at 11:30 a.m.

SALE LOCATION:

At the Ranch (see map on page 2 for directions)
2093 Plevna Road South, Plevna, Mont. 406-778-3819

CATTLE VIEWING:

The bulls can be viewed at Bruce and Eric Bowman's feedlot 1 mile south of Rhame, N.D., until March 18th. After this time the bulls will be at the ranch.

SUPPLEMENTAL SHEET

Supplemental Sheet with Updated Carcass EPDs, Scrotal Measurements, Frame Scores will be available online a few days before the sale and on sale day.

SALE VIDEO

The video of the sale cattle will be available to view by March 1, 2026 at www.milkcreekreds.com or www.dvauction.com. If you don't have high speed internet or are unable to view the video over the internet, contact us for a DVD on the sale cattle.

SALE FORMAT:

Once again we will be offering the bulls through a rancher's auction. We will have an auctioneer that will auction the sale in a relaxed atmosphere. Each interested buyer will be able to bid on the bull of their choice with low pressure and the ability to be comfortable.

Online bidding will take place on DVAuction. Go to www.dvauction.com.

PHONE ORDERS

Buyers unable to attend the sale may call or send their bids to the owners, Bruce or Tena Ketchum. If you would like to discuss the sale offering, call us and describe your needs and budget and we can select your genetics for you. We can bid on the animal for you and you pay only the bid price established by the auction. Bids are handled in confidence on all orders. If there are several people needing to use this method for the sale we will set up a conference call for you to call into during the sale. Please call a few days in advance if this is needed so that we may set this up and get you the necessary phone number and information ahead of sale time.

SALE CONTACTS:

Red River Inn406-778-3321
Miles City, Mont.
Sleep Inn & Suites.....406-232-3000
Miles City Inn & Suites.....866-599-6674

TERMS

The terms of the sale are cash. All settlements will be made with clerks of the sale immediately following the conclusion of the sale and before any cattle will be released. We will follow the Terms and Conditions set forth by the Red Angus Association of America. Announcements made by seller on sale day take precedence over any statements printed in this catalog or advertisement.

DELIVERY

We will provide delivery up to 500 miles. Over 500 miles we will work with the buyer to make arrangements on delivery. **A \$100 credit per bull will be applied to the purchase price of the bull if the new owner picks up the bull(s) on the day of the sale.** Delivery of the bulls will start the week after the sale.

BULL HEALTH PROGRAM

The bulls received Vision 7 at branding, preconditioned in August with Bovishield Gold One Shot and Vision 7 Somnus. The bulls were boosted with Bovishield Gold in September. They were drenched with Safe-Guard and poured with Protectus in November. In December they were given the first Fusogard vaccination. The bulls in January were poured with Clean-Up II. In February, they received their booster vaccination of Fusogard. Semen evaluations were performed by Fallon County Vet Service prior to the sale, and all the evaluation forms will be available sale day. Bulls that do not pass the semen evaluation will be available for sale after they have a satisfactory evaluation.

BULL DEVELOPMENT

The bulls are fed on a ration to develop them into sound functional useable bulls that will work in every environment. The ration consists of rolled corn (6.25 lbs. average), corn silage 17 lbs., dry distiller's (3.5 lbs.), and the balance of chopped hay that consists of ground grass, alfalfa, and barley hay, along with a vitamin & mineral supplement. This ration is developed to use 1% of the feed base being grain to reach our goal of 2.5 lb. gain. They have been developed at Eric and Andrea Bowman's feedlot which is located 1 mile south of Rhame, N.D.

SEMEN INTEREST

Milk Creek Reds is retaining one-half revenue-sharing semen interest in all bulls in the sale. The retained semen interest by Milk Creek Reds allows us to collect semen, use semen on the bull in our herd, as well as share in semen revenue if the bull would develop interest to be used in other herds or semen marketing companies. Any semen collection would be at the buyer's convenience in the off-season use. Full possession and full salvage value sells on all bulls in this sale.

A big thanks to Tracey and Kacey!

Sale Information

WATCH AND BID ONLINE AT DVAUCTION.COM

Can't make the sale?

We are pleased to bring you real-time Internet bidding and a live broadcast of this sale through DV Auction. To watch or bid online, simply complete the following steps:

- Visit the DVAuction web site at www.dvauction.com
- Click on the "Register" tab
- Enter a user name, password and your contact information.
- Click on "Apply for Bidding."
- Select the sale from the list of other auctions and click "Apply".
- Complete the process by filling out the Banking & Lending information requested.

Be sure to include a personal contact at your bank, we will contact them in order to get a credit reference.

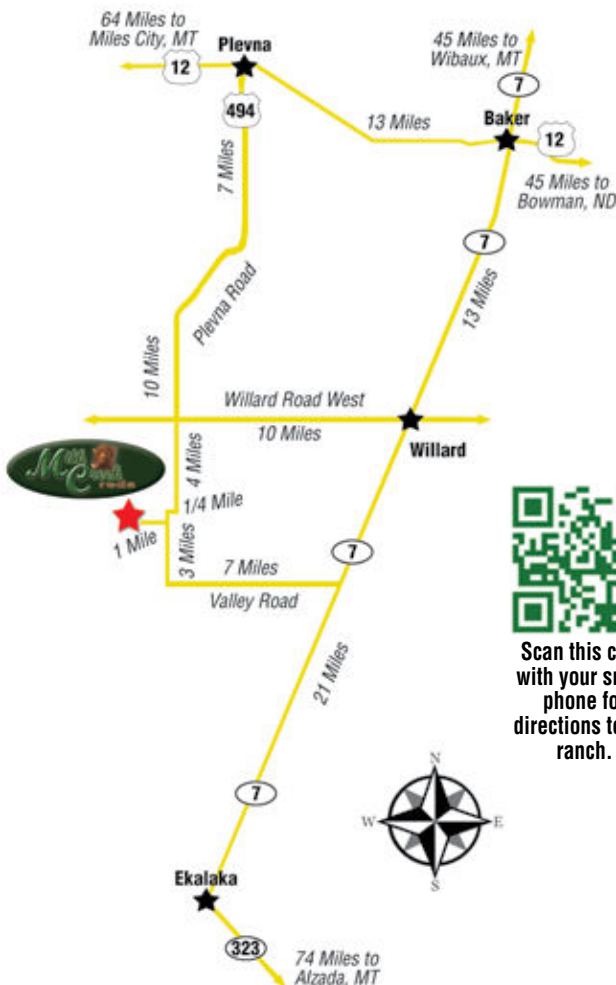

If you would prefer to be approved using your credit card, call (402) 474-5557.

Please be sure to apply for bidding at least a day in advance of the sale—every effort will be made to process your application in a timely manner.

DVAuction will contact you once you have been approved to bid. We do not provide buyer numbers until you have purchased a lot in the sale, and that number is only usable for that auction. After the sale contact the sale owner or manager to make arrangements for payment and delivery of your online purchases.

Please Note: High speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DVAuction at (402) 474-5557 or email support@dvauction.com.

Proxy Bidding: If you can't access a computer during the sale, you can now place a "proxy bid" through DVAuction. Simply follow the instructions listed above, and as the sale date nears there will be a "Proxy Bidding" link under the sale listing on the main page of DVAuction. You can then place the maximum amount that you'd like to bid, and our system will represent your bid just as if you were there.

Scan this code with your smart phone for directions to the ranch.

RIDGE ADMIRAL 3411

oldest females are now 11 years old and bringing in good calves while functioning very well in our environment. You will see some of his daughters bringing bulls to this offering. While this bull does well on all the indices, when you study the numbers, his growth EPDs that are not what some people would say are ideal, yet it is where we like them to be for the female to fit our eastern Montana environment. Owned with Sandbur Ridge Red Angus.

Fusion 5202 is a bull that the Lelands selected out of our 2016 sale. He has been a good calving ease bull for them and has provided both bulls and heifers that have been well received by their customers. After calving five sets of heifers that were bred to him, we have

been pleased with the calving ease, but the nugget in these genetics are going to be the females that he produces. He has numbers that are very attractive to the industry, minus his growth EPDs. His growth numbers; however, will allow his daughters to thrive on less inputs which equates to a better profit margin for the cow/calf producer. Owned with Leland Red Angus.

After three trips to Canada studying the cow herd at U2, we concluded we needed to sample a pedigree that worked multiple times in their program. After studying bulls and cows both

spring and fall, we selected Money Talks. We used Money Talks (530F) on both heifers and cows and then turned him in with 50 plus head of first-calf heifers for natural service and had only three opens. He has now recorded 374 progeny in six calving seasons and we are very pleased in the balance of birth, performance, carcass and phenotype. We are calving his fifth set of daughters and they are displaying excellent udders and feet while being good mothers. As you study this offering you will find that these daughters are bringing in some powerful offspring.

Advocate 0401 combines multiple generations of great functional cows with longevity. After calving the last three calf crops out of him, we used him as a cleanup bull on heifers. He offers calving ease with above average growth and good carcass traits. We lost him due to an injury that would not allow him to breed naturally so we are using him AI.

Sumo 2104 is a moderate framed 5L Bodybuilder son that we picked out of the Flatwater Gang sale in 2023. His progeny are moderate, easy fleshing and have good performance. His first daughters are calving this spring and full of capacity with that easy keeping look. We will be using this sire more as we collected him this past fall to be able to use him A.I. as well as natural.

Copenhagen 2223 is a bull that we kept back out of the Princene 338A cow we had purchased from the Crowfoot dispersal. His progeny have an attractive look to them with good performance and the females should be as good as it gets.

Our ET program has produced another sire that we are using to perpetuate good genetics out of proven cows. As a yearling, 2412 was ran in a large group of heifer calf pairs with Money Talks. Out of 107 pairs, we had five opens in the group but the DNA only provided

us with two progeny out of this good young bull. Money Talks didn't let the competition work his pasture at all. We have continued to use 2412 in a multi-sire pasture with Money Talks and in this calf crop he was able to bring in 4 progeny.

2220 was our high selling bull in our 2023 sale selling to Curt Knight in South Dakota. We used him AI and this is his first offering that has done well from birth through yearling. He ranks well on the indicies and has posted ratios of 99 BW, 103 WW, and 105 YW on his bull calves. His 6 year old Money Talks dam brought in the highest weaning bull calf this past fall.

We found Julian 22a at Flying K in Saskatchewan. He was in a pen just gathered out of cows and looked to be 4 or 5 years old but when we asked Brian how old he was it turned out he was eight. He had great feet and was very fluid in his movement and the daughters we saw were impressive. Sandbur Ridge, Heart River Red Angus and Milk Creek talked Brian and Christine into allowing us to get semen on the bull. These are the first of many offspring that we will offer.

Five Star is an Admiral son that sold in our 2023 sale to Rogers Ranch Red Angus and JS ranch in Missouri. With our small semen inventory of his sire we used 5 Star to bring forth the attributes that his sire has provided for us over many calf crops. If you like cattle moderate, thick and tanky, you will like his progeny.

RED ANGUS GUIDE TO EPDS

RedAngus.org

ProS – Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include CED, ADG, HPG, STAY, MW, DMI, CW, MARB, REA and Fat. **Index | Dollars per Head | Higher Value**

HB – HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. This index is a combination of CED, CEM, WW, Milk, MW, HPG and STAY.

Index | Dollars per Head | Higher Value

GM – GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feed yard performance and carcass traits. GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. This index is a combination of ADG, CW, DMI, MARB, Fat and REA. **Index | Dollars per Head | Higher Value**

CED – Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. **Percent | Higher Value**

BW – Birth Weight predicts differences in actual birth weight of progeny. **Pounds | Lower Value**

WW – Weaning Weight predicts differences in 205-day weaning weight. **Pounds | Higher Value**

YW – Yearling Weight predicts differences in 365-day yearling weight.

Pounds | Higher Value

ADG – Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. **Pounds | Higher Value**

DMI – Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. **Pounds | Lower Value**

MILK – Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. **Pounds | Higher Value**

ME – Maintenance Energy predicts the difference in maintenance energy requirements. **Mcals per Month | Lower Value**

HPG – Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding.

Percent | Higher Value

CEM – Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. **Percent | Higher Value**

STAY – Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age.

Percent | Higher Value

MARB – Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. **Marbling Score Units | Higher Value**

YG – Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. **Yield Grade Units | Lower Value**

CW – Carcass Weight predicts differences in actual hot carcass weight. **Pounds | Higher Value**

REA – Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. **Square Inches | Higher Value**

FAT – Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. **Inches | Lower Value**

Lot 2's dam has been very consistent in her production bringing in top calves every year earning her a 106 MPPA. This year's bull is a standout Fusion 5202 son that not only ratios well in growth and carcass but also has a herd bull look. His length, depth, and thickness when added to a respectable EPD and Index profile positions him to fit well in the top pen of bulls.

Lot 3 is a very balanced Life is Good son backed by generations of good cows. He started with a moderate birth weight, was toward the upper end at weaning and finished at the top of his contemporaries at a year of age. He is smooth made, balanced in length and depth and carries a decent EPD profile. His dam is 9 years old this spring and has a beautiful udder, great feet and a 103 MPPA.

Ridge Admiral continues to have his influence through his daughters in our program. Lot 8's dam is a result of our embryo program where we flushed a top performing 10-year-old cow to Admiral and the result is having daughters bring bulls to the top pen in our sale. 5305 is a smooth, thick-made bull with a nice performance package.

Moderate, thick and attractive describes Lot 9. He is a bit younger than most of the bulls that he is penned with but has earned his way by posting the 3rd and 2nd highest weaning and yearling weights respectively. His dam is a moderate, thick-made 5-year-old 5L Cowboss daughter that consistently brings in calves above average, as has her dam and granddam.

Lot 11 is our only Admiral son in the offering this year. He combines two sires that we have used extensively, and the result is a balanced individual that hits many of the marks with individual performance while ranking near the top within the breed on the indices. He is a bull that can work either on heifers or cows while producing daughters that will stay in the herd and be profitable.

Trailing heifer calves.

5268 was the standout bull calf in the first-calf heifer pasture and measured it on the scale, bringing in the highest weaning weight in his contemporary group. He combines the calving ease trait of the Julian 22A line with Fusion 5202 which will bring calving ease but won't sacrifice the growth or the maternal.

Lot 19's dam is currently in our donor program after producing 7 calves with a 92-birth ratio and a 105-weaning ratio. Her daughter last year was selected for the NILE and sold to L Lazy T Cattle Company at Harlem, MT. This Foreman son should be a great heifer bull but will produce progeny with good growth as well as great females.

Combining strong cow families on all sides of the pedigree can build confidence that the progeny produced will have above average performance and great maternal traits. Lot 34 started life at 78 pounds but continued a growth spurt that earned him a 106 weaning and 105 yearling ratio. He is also above average in marbling and ribeye.

Headed back to pasture after ultrasounding.

This low-birth-weight bull ratioed above average for both weaning and yearling weights while being in the top 12% of the breed for Marbling and having an ADG of 3.21. He is in the top 18% of the breed for the ProS index and the top 14% of the breed for the GM index. He could easily be used on heifers to produce calves that come easy but grow and do well in a feedlot.

Lot 47 is our only Body Builder son in the sale and is the result of our embryo transfer program. His dam has great feet and udder and produced here until 11 years of age and then was purchased by Lone Tree Angus of South Dakota. He is thick and deep just as you would expect from his pedigree. His females should be exceptional.

5234 is a bull that is a prime candidate for heifers on account of his birth weight and EPD profile. When you study him phenotypically, he has the length, depth and thickness to look good in a herd of cows.

Commercial cows headed to the hills.

As we enter our last pen of bulls we start with a Fusion 5202 son out of a first-calf Body Builder daughter that balances birth weight with good performance. The genetic combination in this bull should produce some excellent female replacements as well as male calves that perform.

Lot 100 combines two strong cow families that have worked on our operation and have stood the test of time. His dam descends back to the Sheba 1014 cow which is the mother to Advocate 4304 and Senn Money Talks 129 and 3 other daughters that have bulls in the sale. His sire's dam is the mother of the Fusion 5202 bull and Advocate 0401 that are working very well.

“In Gate”

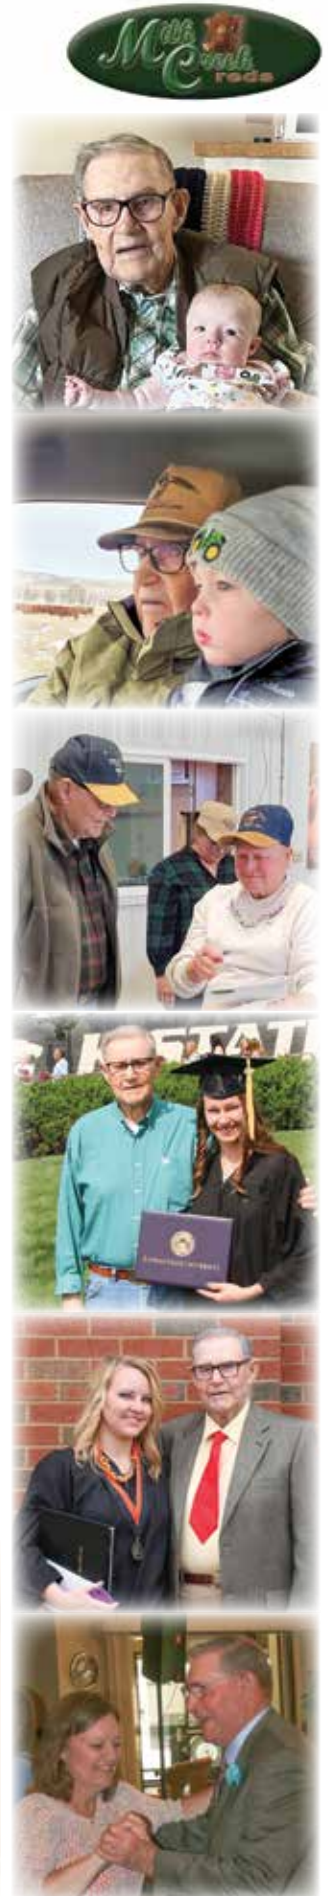

The man that opened the “In Gate” at our bull sale for many years was my dad, Otto Sever Enkerud. Yes, his pedigree would read 100% 1A Norwegian!

I could tell you about his character that he was a visionary, a steward of the land, cattle and people or I could tell you about his integrity, his perseverance, or his work ethic. Those of you at the bull sales that he got acquainted with and he so enjoyed visiting with already know these details about him. Instead, I decided to share a few memories.

Dad and I had a very special father/daughter relationship. From the time I was old enough to go with him, he would take me with him. Where we ended up might be checking cows at the Homestead, irrigating, shoveling wheat, out South on the Association or at the Tastee Freeze in town for an ice cream cone on a hot summer day. The times we spent on the Wittmayer Grazing Association that he founded for the cattlemen in the Glasgow area were some of the happiest memories for the both of us. He loved to be horseback working cows in “God’s Country” as he would refer to it. Many nights after a day irrigating, haying, working on the place, you might find Dad and I in the yard playing catch with the baseball (he loved playing sports and in his later years watching sports) or shooting hoops. Sometimes, we would walk down to the riffles (river) and throw a fish line in the water to see what we could catch. He would take me to the bowling alley on league nights where I would keep score and make a few extra bucks. Yeah, I was his sidekick! As I graduated H.S. and became a Bobcat (he loved the Cats) I developed a relationship with Bruce. Dad and I had delivered a horse to Miles City and went back home via Ketchum’s. On the way home, we were talking like we would do on so many other excursions that we shared, Dad asked, “So is this relationship getting serious?” This was just the start of a beautiful bond that the four of us shared. As our girls were born, he enjoyed watching them play volleyball, basketball, showing cattle or pigs and watching them run poles, barrel race or goat tie. He made it to their H.S. graduations and college graduations as education was very important to him. When his great grandchildren, Blaze and Ember, were born he was so happy and enjoyed being able to spend time with them. In 2024, Dad had a fall where he needed to have physical therapy often. He came to Dahl Memorial LTC in Ekalaka. We were blessed to have him close to our family the last months of his life. During this time of his life there were several fond memories. He would always ask, “What is going on at the ranch?” We spent time watching football, talking about old times, his life, mom, the girls, the great grandkids, the cows, but most importantly his faith and the future.

On October 19, 2025, my Dad left this world and opened the most important gate the “In Gate” to heaven. I’m very thankful for the man he was and the qualities he passed on to me!

Ranch Philosophy

The cattle industry is constantly changing and feeders and packers seem to be the drivers in directing that change. Their ability to direct change is related to the concentration of ownership within these two segments of our industry. Both segments keep increasing the size of animal that they want to feed and harvest because of their efficiency of producing more pounds of beef per animal and reducing the costs by feeding and harvesting less head of cattle and leaving them within the feedlot for longer periods of time. What impacts their bottom line is diametrically opposed to what impacts the cow/calf producers bottom line.

In our segment of the industry, most cow/calf producers raise cattle in an environment that has limitations to what it can produce hindering our ability to meet the changes without increasing input feed costs to sustain the larger, higher output cattle that the feeders and packers are looking for. Coupled with this the feed input costs has increased dramatically over the past four years compounding the problems to reach profitability within our segment of the industry.

I am thankful that our Red Angus Association staff is working hard to educate the industry on the quality of Red Angus cattle and how they can reach all the requirements in the branded packer programs that have been set for Angus cattle. Through this effort, the USDA has recognized Red Angus as Angus so that they are able to qualify in all programs with the exception of CAB which is owned by the Angus Association. This education is going to take time to develop traction and will eventually open more marketing opportunities for our cattle. In the meantime, the industry is using excuses to discount red hided cattle so that they can add more profit to their segment of the industry. With the current cattle inventory, we are hopeful that the next three years will see above average feeder cattle demand which will diminish the ability for discounts because of hide color.

We continue striving to produce cattle that will be able to thrive in a grass-based environment without any inputs other than salt, mineral and some hay when needed due to drought or severe winter conditions. When you study the genetics that we are using you might ask, why don't you use higher growth sires to increase the weights of your calves? The answer lies in what we have discovered when we have attempted to do that very thing. Most sires that we have used to accomplish this, with exceptions of a few outliers, tend to produce females that have a higher percentage chance of failing to breed as yearlings or first-calf heifers because they have a higher energy requirement than what our natural environment can provide. That can become very expensive when you account for the time and dollars invested in developing those females to that stage.

The sires that we are using will still push the envelop of producing offspring with performance that is limited by our environment on any given year because our weaning weights can fluctuate 50-100 pounds based on when and how much rain falls from the sky. We continue to search the breed for the outliers that will push the performance as well as carcass traits but will not give up the fertility and longevity developed within the herd which are the key profit drivers for any cow-calf operation.
