41st Annual Production Sale

FRIDAY, APRIL 10, 2026

Sidney Livestock Market Center • Sidney, MT • 1 p.m. MDT

DVAuction
Broadcasting Real-Time Auctions

Cattle Producers and Friends,

On behalf of the Thiessen family, we would like to welcome and invite you to our 41st annual bull sale. This year marks our 69th year of raising and offering high-quality, balanced-trait registered Angus bulls. Thank you for taking the time to review this catalog.

We would like to start off by congratulating each and every one of you. You finally got paid for your efforts! This past year we saw record highs again for calves, whether it was right off the cow or out of the feedlot. There is a lot of media talk about increasing the nation's cow herd, how beef is too expensive, how the American ranchers are gouging the consumers. We say BS! When a pound of hamburger is still cheaper than a package of Oreos or a coffee at the corner wagon, then quit your complaining! And the ranchers' cut of the retail price is still a small percentage. Labor costs throughout the whole process are still the major contributor to the final price tag.

We get a lot of comments and questions about the current bull market and what bulls are going to cost this year. Last fall, the legendary Kurt Kangus gave a presentation at the Montana Angus Association's annual meeting showing a comparison of the price points of calf sales and bull sales over the last couple of years. We wish we had time to get those slides from him but what was most interesting is that even at an increase of \$2,500 over last year's bull sales, these will be the cheapest bulls you will have bought in many years. When you figure the cost of bulls based on number of steer calves it takes to buy one, it will only be around 3.5 steers to buy a bull at \$9,500 sale average. The last couple of years we've seen that number around 4 to 4.2 steers. That's not even factoring in the \$4,000 a mature, old bull is bringing as a canner. We are in unprecedented times in the cattle business. We believe it is not time to sit back and enjoy it, it is time to be aggressive and take the reins of this machine while we are in the driver's seat so we don't ever see 80/90 cent calves again!

We have had increased interest over the last couple years in registered females, so we decided to offer a small group heifers this year. It has always been difficult to go through and decide which heifers to keep and which to sell as commercials but picking 10 elite females to sell turned out to be most challenging. We feel these heifers are as good as you can buy anywhere.

At Regency Acres Angus, our mission is to raise as labor free and forage efficient of a cow as possible and for that cow to be a predictable breeder. We breed for smart, sound cattle that can travel; cattle with length, volume and that extra rib; cattle that are easy fleshing and cattle with longevity that are nice to be around. We want cows with good udders that take care of their calves, that have vigorous calves that get up quickly and get to suckling. We breed for cattle that are beefy, long, and deep that perform under a wide array of conditions. All of those are traits we select for and are traits that are passed on though genetics. The genetics that are introduced into our herd are done so with much research and contemplation. We score our cattle on many little things that can make a big difference. With that said, one can look through the cattle and appreciate the depth and uniformity of the cattle and the progress that has been made.

You're welcome to come view the bulls and heifers any time before the sale at the ranch. Videos of the cattle are posted on DVAuction.com.

We look forward to seeing you on Friday, April 10th.

The Thiessens

Our Mission
To propagate genetics that will return the most dollars per acre for our customers.

Welcome to the Thiessen's Regency Acres Annual Production Sale!

It is my pleasure to invite you to the annual bull sale at Regency Acres Angus, hosted by the Thiessen family. Their long-standing commitment to raising high-quality Angus cattle is evident throughout the program, built on a foundation of integrity, hard work and a genuine passion for the beef industry.

At Regency Acres, the cow herd remains the heart of the program. Russ and Tyler place great emphasis on their females, recognizing that the cows are the true factory behind the cattle they produce and provide to their customers. By focusing on a productive, dependable cow herd, they continue to build a program that delivers practical, reliable seedstock for commercial cattlemen.

For 69 years, the Regency Acres program has been guided by the goal of producing cattle that work in real-world environments. Longevity, structural soundness and overall performance remain key priorities in their breeding decisions. This disciplined approach has helped establish a program that customers can depend on year after year.

The bulls offered this year represent the consistency and reliability that have defined Regency Acres for generations. Backed by a program with 69 years of experience, these cattle are developed with the kind of practicality and purpose that commercial producers value.

In addition to the bulls, this year's sale will feature 10 elite registered heifer calves from the heart of the Regency replacement female program — a select opportunity to access the genetics behind the cow herd that drives the program.

Russ and Tyler continue to stand behind their program and remain committed to helping customers find the right bulls to move their herds forward.

If I can be of any assistance leading up to the Regency Acres sale, please don't hesitate to reach out.

Warm regards,
Ron Frye

Helpful Hints for Care of Herd Bulls

Having herd bulls adapt to the environment they will be in is very important to the success of a breeding program. Whenever possible, the bulls should be fed the same type of forage they will eat in the breeding pasture for a minimum of two weeks before turn out. Their rumen operates with little bugs to break down the diet and different forages each have their own little bugs. About two weeks is the time required for the rumen to

adjust to a different diet. When a bull is turned out, he isn't thinking much about eating, so any advantage that you can give him will be beneficial to younger bulls.

Another trick for having a virgin bull ready is what we call "Jump-starting." If you have a cow or a heifer around that is cycling, put the bull with her. If he seems disinterested, put another bull in with the cow for him to observe. This should trigger his brain. When the bull appears interested, let him in and remove the other bull. Make sure a bigger bull doesn't start whipping on him, or that could defeat what you are trying to accomplish. It is rare that this procedure is necessary, but it is good insurance and, once the bull gets a taste of what his job is, he will be ready for those heifers.

When breeding season is finished, a reconditioning program for yearling bulls is good as they change their teeth at 18 to 24 months of age.

When you buy from Regency you get ...

Guarantee

Regency Acres is providing a first-year breeding-season guarantee. Breeding season is defined as the 90-day period following turnout. Regency Acres guarantees all bulls selling to be fertile, sound breeders. If a bull is found to be infertile or an unsound breeder as diagnosed by a licensed veterinarian, a credit of purchased price less a salvage value of \$2,500 will be issued towards a replacement bull if one is available or credit in the following year's sale. All bulls selling for \$6,000 or more will be guaranteed against breeding injury. All injuries must be diagnosed by a licensed veterinarian and reported to Regency Acres no later than September 30th. A credit of half the purchase price less salvage value of \$2,500 will be given. Regency Acres reserves the right to have the animal inspected by our vet. Please notify Regency Acres as soon as possible should any injury occur and prior to the animal being sold. This guarantee DOES NOT cover any treatable conditions such as foot rot, lameness from fighting, etc. If neglect by owner is found, no credit will be issued.

This is not a mortality guarantee. Karlee Sailer, Dakota Ag Insurance, will be on hand to assist you with a mortality and loss of use policy if you wish to do so.

Registration Papers

All bulls selling are registered. Papers on the bulls will be transferred upon request.

The buyer has the option to register the heifers for an additional \$200 over the purchase price.

Fertility and Physical Exam

Complete breeding soundness exams and semen evaluations have been conducted by High Plains Veterinary Clinic. Exam reports are available for inspection.

Repeat Buyers and Volume Discounts

Anyone that buys a bull that has also purchased a bull in 2024 and 2025 will receive a 5% discount on their total purchase price. Volume discounts are as follows:

- 5% on 5 or more bulls
- 10% on 10 or more bulls

Johne's Disease or "That damn sh^{it}ing disease!"

Johne's Disease, formerly considered a dairy disease, is becoming very prominent across the beef herds. If you don't know what it is, get your phone out and Google it. We started hearing about this in herds around here a few years ago. This prompted us to test our herd for this devastating disease. At that time the state veterinarian was implementing a program for Johne's and we enrolled. Since then, we have tested all females 3 years old and older and all bulls 2 years and older with all tests being negative. We are now a certified Johne's-Free herd.

As your seedstock supplier, we felt it was necessary to do this to give you the peace of mind when buying from us.

Sight-Unseen Purchase Guarantee

Buyers unable to attend the sale may call or send their bids in to Russ, the auctioneer or any of the representatives listed. If the bull(s) purchased are not as presented, the purchased bull(s) can be returned to Regency Acres at no cost to the buyer.

EPDs:

The EPDs are current as of March 13, 2026. Current EPDs can be found at Angus.org.

Calving Ease Scores:

- 1 Star – Use on mature cows
- 2 Star – Use on cows 3 years old and older
- 3 Star – Could be used on heifers but be ready to assist
- 4 Star – Very little, if any, assistance should be necessary
- 5 Star – Very easy calving; no assistance should be necessary

Free Delivery

Free delivery on bulls and registered heifers to CENTRAL POINTS (stockyards, etc.) within 1,000 miles, or the nearest Canadian port of entry, on all bulls selling for \$4,000 or more. A \$50 credit will be given if you pick your bulls up at the stock yards sale day or within a week of the sale at the ranch. **If you can't take delivery of your bull by May 1st**, we will feed them until you can come pick him up for \$2.50/head/day.

Commercial heifers are the responsibility of buyer as soon as sold. If you need help with trucking we can be of assistance.

Proud Participant in Maternal Plus

While Regency Acres has been tracking maternal traits for decades, Maternal Plus takes it to a whole new level of economically important traits and allows us to make more informed decisions based on maternal genetics. We've always said it starts with the mama cow and Maternal Plus assists us in that decision making process.

DEDICATED. COMMITTED.

WHOLE HERD REPORTING WITH MATERNALPLUS®

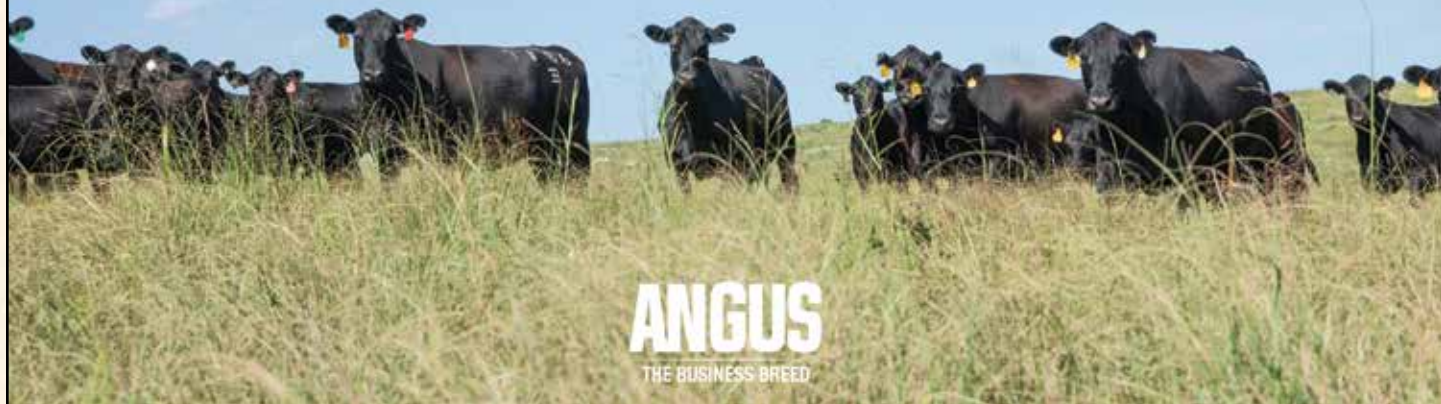

Raising quality registered Angus cattle takes **COMMITMENT**.

As your genetic supplier, we are **DEDICATED** to not only improve today's genetics, but also prepare for the future of the Angus breed. We believe a commitment to improvement starts with the female.

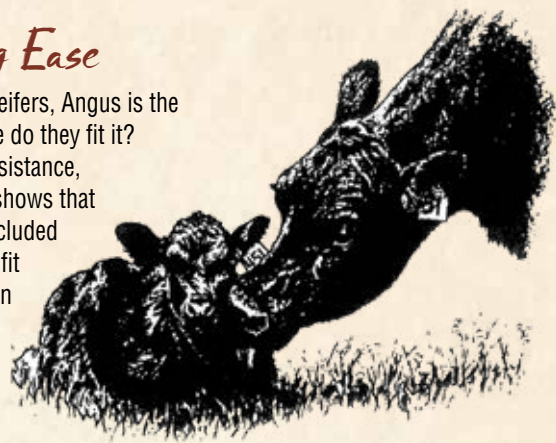

Commit to the female — commit to MaternalPlus®.

Contact Customer Service at 816-383-5100 or angus@angus.org for more information.

Birthweights and Calving Ease

Angus bulls have long been known for their paramount calving ease. If you are breeding heifers, Angus is the go-to breed of choice. But what about the so-called “big” birth weight Angus bulls – where do they fit it? The vast majority of mature cows calve unassisted – it is rare for a mature cow to need assistance, except for abnormal deliveries (backwards, breech, twins, etc.). data reported to the AAA shows that over 99% of Angus cows, second calf or beyond, need assistance (abnormal deliveries excluded from this data). Back to the question at hand: where do the “big” birth weight Angus bulls fit in? Example: If you have a bull with a birth EPD of +5, he would be 3.2 pounds heavier than the average (breed average BW EPD is 1.8) ($5 - 1.8 = 3.2$ pounds difference). However, his superior growth EPDs mean he will wean bigger calves and put way more money in your pocket than the average Angus bull! The moral of the story: if you are breeding mature cows to an Angus bull, do not make birth weight your focus.

Revolution was the high selling lot of the 2023 Spickler Ranch South sale. He is a very complete package bull, smooth made, deep bodied, with excellent leg and foot structure in a slightly moderate package. His progeny are ending up a little more moderate made than we anticipated but still in the right size category. He is proving himself to be a female maker as his daughters are some of the best young cows on the place. Semen available.

COMMERCIAL HEIFERS

20 Commercial Yearling Heifers

- The heifers are bred similar to the bulls selling.
- All have had Lepto/Vibrio and BVD vaccinations.
- They are freeze branded and ready to breed.

They will sell in groups of five with the option to go as deep as the buyer wants. Buyers have the option to buy registration papers at \$200 per head.

The heifers will sell first at
1 p.m. MDT SHARP!

Registered heifers and bulls
will follow in catalog order.

Don't buy an **imposter.**

Not all "Angus" bulls are **REGISTERED** Angus bulls.

If you see this logo in conjunction with an individual animal or group of animals, you know that that animal is registered with the American Angus Association and backed by the power of **data, programs** and **pedigrees** of the Association.

Invest wisely in those that carry the **Powered By Angus** logo.

Look for the **REGISTRATION NUMBER.**

RA Riverside E82 commands attention as our lot 1 herd sire prospect. Sired by the \$132,000 Vermilion Riverside, this bull offers exceptional length of body, genuine power and dimension, all while maintaining the smooth shoulder and balance required in a slight calving ease-oriented herd bull. He is boldly sprung through his rib, long as a freight train and carries the herd bull presence that makes him easy to find in the pen. The maternal side is equally impressive, as he stems from a tremendous Mohnen Success 187 daughter that previously produced one of the sale topping bulls now working at Pleasant Valley Angus. When you combine proven genetics with this kind of phenotype and power, it's easy to see why we believe so strongly in this standout herd sire prospect. We plan to flush his dam this spring.

If you want a super docile bull, this is the one! Lot 3 is a breed leader for disposition. E77 is a true curve bender that combines calving ease with real world performance. He's a long bodied, deep ribbed bull with extra muscle shape and dimension from end to end while maintaining a smooth, attractive front third. E77 moves freely off a solid foot and stands down on the kind of structure required for longevity. If you're searching for a bull that can be used with confidence on heifers while still adding payweight and muscle to the calf crop, keep a close eye on this standout in lot 3. This Revolution son is backed by a tremendous uddered and ultra feminine U2 Coalition daughter. This bull's pedigree screams elite female maker (Grandam is the dam to lot 2.)

RA Riverside E57 is a bull that immediately grabs your attention with his sheer power and mass. Bold ribbed, deep sided and loaded with muscle expression, E57 carries the kind of dimension and substance that cattlemen appreciate. He stands on a big, correct foot and moves with the ease and structural integrity required for longevity. Adding even more value is his maternal backing, as he stems from an elite Pathfinder KG Justified 8007 daughter that is proving herself as a cornerstone female in our program, producing the Lot 3 bull in our sale last year selling to Walker Angus Ranch.

RA Commerce E50 is a bull we believe has the potential to be one of the very best in the entire offering. This calving ease herd sire prospect combines a smooth shoulder, attractive front third and balanced build with the kind of body depth and muscle shape that still demands attention. E50 is backed by a true cornerstone female in our program, a dam that has already produced several top selling bulls along with outstanding females now in production. When calving ease, maternal strength and herd bull presence come together like this, it's hard not to get excited. We plan on Collecting E50 and flushing his dam.

RA Riverside E55 is a powerful son of Vermilion Riverside that combines herd bull presence with a very balanced EPD profile. Long bodied, bold ribbed, and packed with natural muscle, E55 offers the kind of substance and dimension cattlemen appreciate while still maintaining a smooth shoulder and attractive design. His EPD profile adds even more value, posting its impressive growth figures highlighted by his WW and YW EPD in the top 5% & 10%. Not only that, E55 is in the top 5% for teat and udder and 15% for \$M and \$W. Bulls that combine this kind of phenotype, power and performance are hard to come by.

RA QUEEN 6164

Very thick made Revolution son that stands on near perfect feet. The Revolution x Motive mating should be a female making machine! E177's genomic profile puts him as a breed leader for Functional Longevity and PAP! Also ranks in the top 2% for \$M, 3% for Claw, 4% for Docility, and 10% for Teat and Udder.

We expect this calf to exceed expectations as he is out of one of our donor cows. She is a beautiful Success daughter and a maternal sister to the dam of RA Union 2123. We probably should have contemporaried him separate as he spent all spring and the first part of summer at the donor facility in Townsend.

Pathfinder dam and granddam on this high weaning Revolution son. Dam is a long, deep bodied broody cow.

LOT 27

RA
BLACKWOOD
LADY 968,
GRANDAM

Youngest calf in the sale but may be the best phenotypically and EPD wise. Extremely thick-made and smashed the scales at both weaning and yearling. At only 162 days of age, he weaned off at 632 pounds giving him the highest adjusted weaning weight of this calf crop. He was too young to get an adjusted yearling weight but using the formula he comes out of the test at an adjusted 1350 pounds which would give him a yearling ratio of 118! Out of a daughter of the Regency donor cow RA Blackbird 968.

RA Folsom E114 is backed by a cow family that we have tremendous confidence in. His dam is a gorgeous, ultra feminine cow with a very maternal look. The maternal strength only runs deeper, as he traces back to the matriarch 870, a cow we consider one of the very best on the place. Time and time again she has proven her worth through the consistency and quality she passes on to her progeny. With this kind of maternal foundation behind him, Folsom E114 is built on the kind of cow power that makes herd bulls last.

RA EVERELDA ENTENSE D100

*RA Everelda Entense E69 is a female we believe rises to the very top of the program and represents the kind that can truly leave a mark on a cow herd. Bold in her rib shape, deep bodied, and beautifully feminine through her front third, she carries the presence and broody cow look that great females are known for. Structurally she stands on excellent feet and hoof quality, giving her the kind of longevity required of a herd cornerstone. Her numbers only strengthen the story, ranking **top 1% for docility, top 2% PAP, and top 10% for \$M, \$W, and \$F, while posting an outstanding 113 weaning ratio.** Backed by a proven cow family with generations of productive females still working in our herd today, E69 blends phenotype, performance, and maternal strength into a female we believe has **true donor potential and the ability to impact programs for years to come.***

Really fancy-made heifer with a long line of ideal udder structured dams behind her. A member of our great Erica Lass cow family. Dam traces back to the foundation female maker Sitz Traveler 6802 three times. Grandam and great grandam are Pathfinders.

Flush Sisters

Flush sisters out of RA Union 2123's dam. These sisters embody the type and shape that we expected from Revolution. Pathfinder dam RA Blackwood Lady 846 boasts production records of 6 calves with a weaning ratio of 105 while her Pathfinder grandam has 9 at 103 and is still producing in our herd.
